#### Hints and Explanations.

Our standard of good and bud roads is based on the average of the United Kingdom. Cyrlotts, therefore, who are used to the such papered variances which obtain on roads such as the Great North Road, between 18 gafewards and Petersborough, in England, must not be designed in the roads marked Hims do not come up to their expectations. Head winds and mud make a recommendation of the contraction of the contraction

do not come up to their expectations. Head winds and mid make a great difference in once impressions. Rough way you make it is a supervision with the year and under different mattackets. For example, a long drought method to the matter of the company of the com

In Connemara, high winds are very frequent and usually blow from the West. Consequently it is best to enter the country from the North-West, as at Westport, and leave it at Galbasy.
